

# Veeam Disaster Recovery Orchestrator

## Stress-free, automated recovery and planning for any disaster

In today's age, it is not if customers suffer from a disaster, but when. This is especially true with the increase in cyberthreats, like ransomware. No matter what type of disaster there is, disaster recovery plans need to be thoroughly documented and tested, something Veeam® Disaster Recovery Orchestrator does automatically.

Veeam Disaster Recovery Orchestrator takes recovery to the next level by automating disaster recovery processes. From mission-critical workloads with near-zero RPOs to the applications that have been neglected due to a lack of DR planning resources, the same simple tool can be used.

**Reduce risk**

Reduce risk with a tried, tested and true DR plan, proven to work and managed from the same simple, yet powerful, tool

**Save time**

Automate the most time-intensive aspects of DR planning, like creating and updating documentation and testing

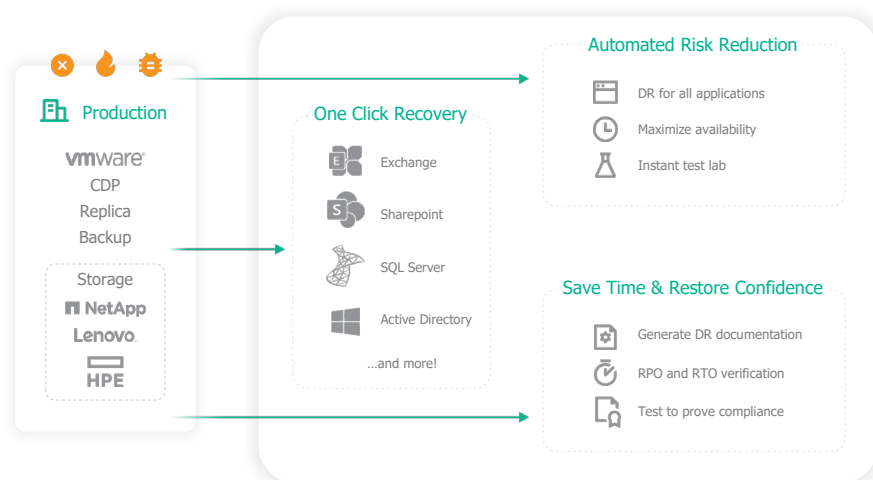

**Restore confidently**

Meet RPO and RTO requirements with one-click failover, failback and restores – from single apps to entire sites

## Take recovery to the next level with advanced automation and testing

### veeam Disaster Recovery Orchestration Stress Free Recovery

### Disaster recovery simplified

Veeam includes even more innovation in our signature DR orchestration solution. Veeam Disaster Recovery Orchestrator is the perfect complement to Veeam Backup & Replication™ and Veeam ONE™. With Continuous Data Protection (CDP), replicas, backups and storage snapshots, Orchestrator enables you to streamline and automate your disaster recovery planning and testing with the same simple tool, no matter what workload you are protecting.

In V5, key capabilities include:

- Storage-based disaster recovery plans for HPE Primera and 3PAR storage systems
- Streamlined operations with the NEW enhanced dashboard view
- Even more flexible disaster recovery plan workflows with the NEW inventory view

### Protect all workloads with DR Pack

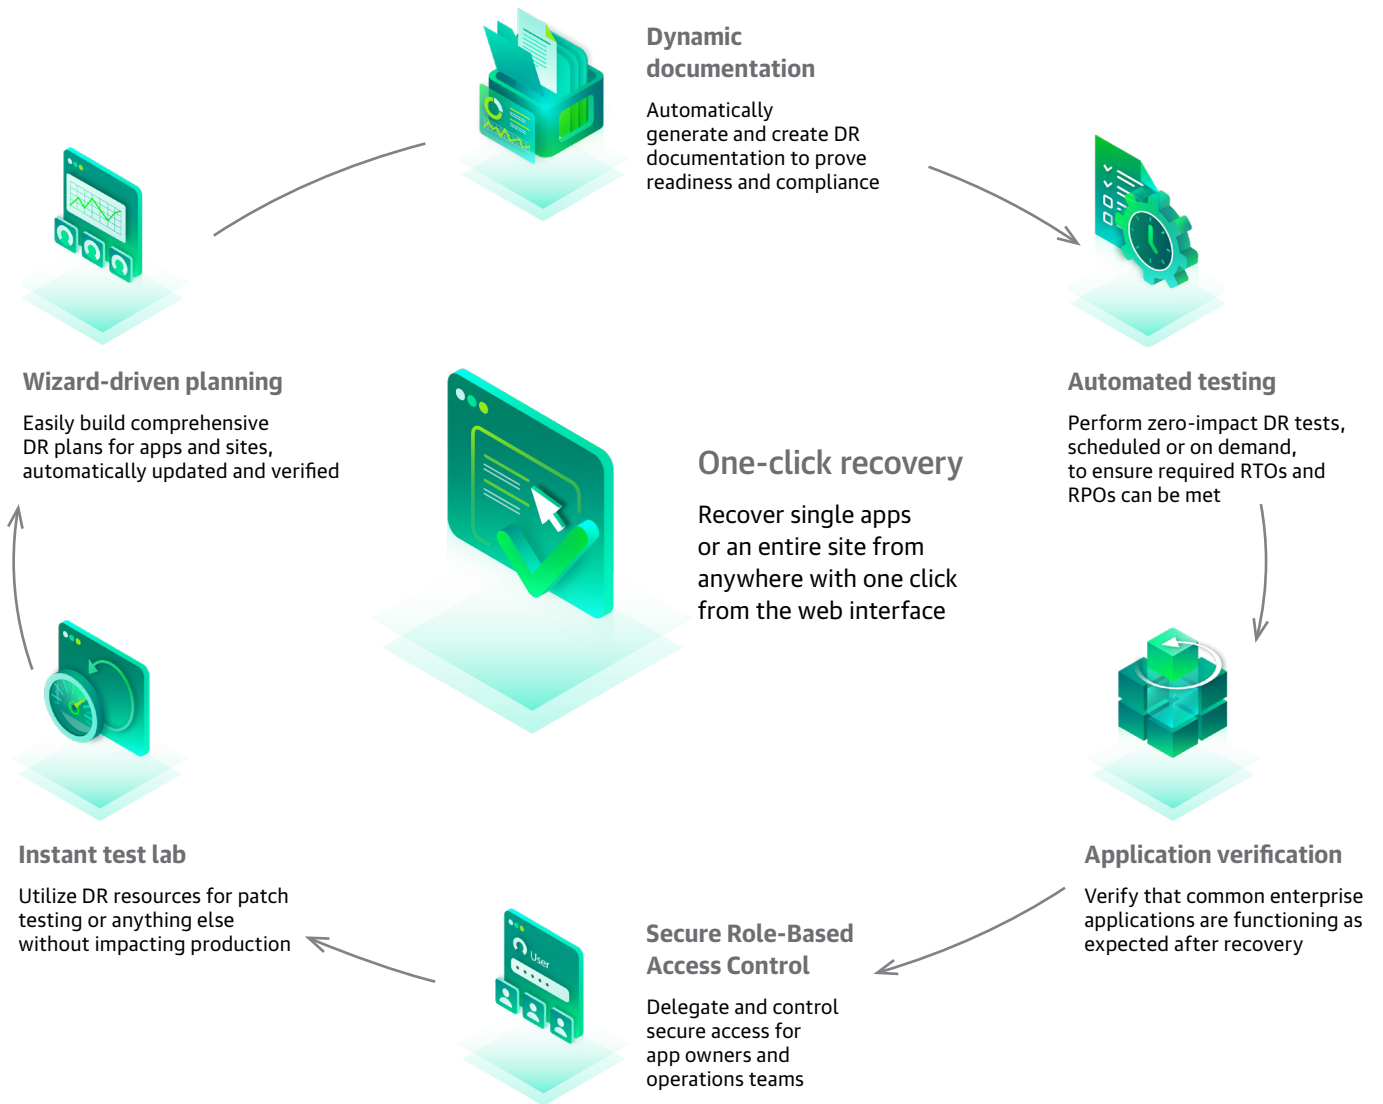

Be ready to recover your whole environment at a moment's notice. Veeam Disaster Recovery Orchestrator is available for purchase as DR Pack, which allows for up to 80% cost savings while ensuring business continuity for all your VMs (not just the most-critical ones)!

Sold in packs of 10 licenses like VUL, the total number of purchased DR Pack licenses must match the total number of VMware vSphere VMs licensed in Veeam Availability Suite™ or Veeam Backup & Replication. Veeam Disaster Recovery Orchestrator is also available in the standalone version, sold in packs of 10.

For more information, please contact sales.

## Reduce risk, save time and restore confidence in disaster recovery

Ready to take recovery to the next level? Here's just one way to do it with Veeam Disaster Recovery Orchestrator's robust feature set:

### Comprehensive support for enterprise infrastructure and apps
